

Invenergy

Short Mountain Wind Energy Center

The Short Mountain Wind Energy Center is a proposed 80 megawatt (MW) wind power generation facility in Hardy County, West Virginia, targeted to begin operations in 2024. Wind energy is clean, renewable power from one of the oldest known energy sources, and today it is one of the cheapest.

Enough electricity to power more than **28,000 American homes**

More than **\$7.9 million** invested in local taxes, landowner payments, and wages and benefits

More than **150 jobs** supported during construction

3-4 full-time operations and maintenance staff

Emissions reductions equivalent to **31,000 cars** off the road

Supports local education, emergency & veteran services and environmental stewardship

19 state-of-the art wind turbines manufactured by **Vestas**

80 megawatts of sustainable energy

Development Timeline

2021 – 2023

Development

Activities include wind assessment, environmental studies, interconnection studies, etc.

Q2 2023 – Q3 2024

Construction

Q4 2024

Operation

Invenergy's Grand Ridge Wind Energy Center located in LaSalle County, Illinois.

A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$216 million annually in the home communities where its projects are located.

Invenergy has successfully developed more than 180 projects, totaling over 29,000 megawatts, including wind, solar, natural gas power generation and advanced energy storage projects.
